We continued to take advantage of the low freight market, as we did in the second quarter, bringing forward drydocking of vessels resulting in 85 scheduled off hire days for the quarter. This has been done with the view to have as many trading days as possible available for 2022, a year for which we are constructive on the outlook. Further, the cost of loss of income has been low during the weak freight market. When vessels come out of drydock, they are typically handicapped in the spot market for their first voyage and have to offer discounts, and possibly encounter waiting time, to commence trading. Hence, our spot earnings were negatively impacted during these periods.

Our business remains impacted by the Covid-19 virus outbreak with operational challenges related to our seafarers and our ability to change crews at regular intervals. There are still numerous restrictions affecting crew changes with strict transit and quarantine procedures and a limited number of geographical options to execute crew changes. We continue to do everything we reasonably can to facilitate safe and regular crew changes.

We note three key forces at play, in sum creating a constructive market outlook for our service. Firstly, oil consumption, and hence demand, is recovering post the virus outbreak, in particular as a consequence of increased mobility. Secondly, refiners have been consuming from oil inventories which again have been drawn down to levels targeted by leading oil producers. And thirdly, OPEC+ is gradually increasing supply of oil in response to the two preceding points, slowly increasing demand for transportation.

As of September 30, 2021, DHT had a fleet of 26 VLCCs, with a total dwt of 8,043,657. For more details on the fleet, please refer to the web site: <https://www.dhtankers.com/fleetlist/>

SUBSEQUENT EVENT HIGHLIGHTS:

- On October 22, 2021, The Norwegian Shipowner's Mutual War Risks Insurance Association ("DNK") obtained approval from The Financial Supervisory Authority of Norway to return \$300 million to its members. As a member of DNK, DHT expects to receive between \$5.5 million and \$6.5 million as distribution of equity within the first quarter of 2022. The distribution may be subject to withholding tax.

OUTLOOK:

- Thus far in the fourth quarter of 2021, 70% of the available VLCC days have been booked at an average rate of \$20,700 per day on a discharge-to-discharge basis (not including any potential profit splits on time charters).
- The Company will continue to take advantage of the weak freight market to bring forward dry dockings and planned installations of scrubbers and ballast water treatment systems. Scheduled off hire is expected to be in the range between 100 and 125 days during the fourth quarter of 2021.

RECONCILIATION OF NON-GAAP FINANCIAL MEASURES

The Company assesses the financial performance of its business using a variety of measures. Certain of these measures are termed "non-GAAP measures" because they exclude amounts that are included in, or include amounts that are excluded from, the most directly comparable measure calculated and presented in accordance with IFRS, or are calculated using financial measures that are not calculated in accordance with IFRS. These non-GAAP measures include "Adjusted Net Revenue", "Adjusted EBITDA" and "Adjusted spot time charter equivalent per day". The Company believes that these non-GAAP measures provide useful supplemental information for its investors and, when considered together with the Company's IFRS financial measures and the reconciliation to the most directly comparable IFRS financial measure, provide a more complete understanding of the factors and trends affecting the Company's operations. In addition, DHT's management measures the financial performance of the Company, in part, by using these non-GAAP measures, along with other performance metrics. The Company does not regard these non-GAAP measures as a substitute for, or as superior to, the equivalent measures calculated and presented in accordance with IFRS. Additionally, these non-GAAP measures may not be comparable to other similarly titled measures used by other companies and should not be considered in isolation or as a substitute for analysis of the Company's operating results as reported under IFRS.

Derivatives - interest rate swaps

Only derivatives are classified and measured at fair value in the statement of financial position. Fair value measurement is based on Level 2 in the fair value hierarchy as defined in IFRS 13 Fair Value Measurement. Such measurement is based on techniques for which all inputs that have a significant effect on the recorded fair value are observable. Future cash flows are estimated based on forward interest rates (from observable yield curves at the end of the reporting period) and contract interest rates, discounted at a rate that reflects the credit risk of various counterparties.

As of September 30, 2021, the Company has nine amortizing interest rate swaps totaling \$340.1 million with maturity ranging from the second quarter 2023 to the third quarter 2023. The average fixed interest rate is 2.95%. As of September 30, 2021, the fair value of the derivative financial liability related to the swaps amounted to \$15.7 million.

Historically, both charter rates and vessel values have been cyclical. The carrying amounts of vessels held and used by us are reviewed for potential impairment or reversal of prior impairment charges whenever events or changes in circumstances indicate that the carrying amount of a particular vessel may not accurately reflect the recoverable amount of a particular vessel.
